Embedded Academy

CATALYST
TOP **30** MOST DESIRED
EMPLOYERS
2022

Are you ready to take on a functional Automotive project?

Take on real-life challenges where you get to dive into the world of Embedded software. You will be mentored by leading experts to unleash your creativity and develop a real-life functional Automotive project.

We truly believe that giving you the space to learn by "trial & error" sparks your innovation. This is your chance to immerse in the software process and master skills that are essential in the everyday work of any leading company — you'll get to work with other talented students in top-notch offices and blow us away with the application of new concepts.

Is this you?

You are fluent in **English** and currently pursuing a Bachelor's (final year), Master's degree or you are a fresh graduate.

You are looking for a **part-time**, **paid experience** that might land you an **entry-level job** afterwards!

Discover your office!

YOUR FUTURE STARTS **TODAY!**

- 4-month Academy Flexible schedule
- Mentorship F2F training
- Hands-on learning

STEP INTO THE AUTOMOTIVE EMBEDDED WORLD

Sleeves up, hands-on learning

> 4-month training — work on a real-life Automotive project
> Fundamentals of Automotive tools
> Count on an Agile work environment and on your dedicated mentor
> Be the team player you were born to be. Work alongside students from e.g. Brasov, Sibiu or Cluj
> Get your feet wet and land an entry-level job afterwards

What you are good at & what you'll need to win

> Degree in Computer Science, Electrical/Software Engineering, Mechatronics or any other related field
> Basic knowledge of C programming and microcontrollers
> Previous Embedded development experience is plus
> Logical thinker, self-starter and fast learner
> Fluency in English is a must
